Paint Shop Throughput

Paint Shop Throughput Workshop

A QUICK CHANGEOVER APPROACH

If it is not properly managed the paint booth can become the limiting factor for the entire business. This workshop will focus on improving paint booth utilization by working on the processes in and around these very valuable pieces of equipment. This approach is focused on delivering quality, speed, and cost performance in the refinish operations.

Lean for Collision

Re-Engineering the Processes for Success, Today and in the Future

Today's rapidly changing collision industry offers significant opportunities for the collision center that is equipped with the knowledge, expertise and commitment to evolve with emerging trends and meet the challenge of change head on.

WHO SHOULD ATTEND Shop Owners, Shop Managers, Production Managers, Paint Department Staff, Servicing Distributor Staff, Local PPG Staff

WORKSHOP OBJECTIVE Increase paint department throughput by optimizing paint booth utilization.

WORKSHOP LENGTH 3 full days on-site

CLASS SIZE 10 minimum, 30 maximum (venue permitting)

- TOPICS COVERED**
- Current performance based on historical data: Booth cycle time, Paint hours produced, Production efficiency
 - Measurement of booth cycles to identify improvement opportunities
 - Potential for the shop based upon equipment and personnel
 - Action plan designed to drive improvement based upon opportunities identified
 - Meet with entire team to discuss & refine action plan
 - Begin implementation of action plan

MINIMUM REQUIREMENTS Completion of 1 day Paint Shop Throughput course by Shop Owner and preferably a lead painter or Completion of Green Belt with data leading to the Paint department as the area to begin. Any PPG or Nexa Autocolor® customer is eligible to attend any MVP Business Development Series course.

Rapid Improvement Workshops

Rapid Improvement, it's about getting things done

A Rapid Improvement Workshop is a technique for quickly and effectively getting things done. During a Rapid Improvement Workshop you and your team will be lead by a MVP Black Belt facilitator through an on-the-floor workshop. Immediate results are realized through a hands-on effort, working directly on a planned scope project moving quickly from the Current State to a Future State.

A key focus of the Rapid Improvement Workshop is to teach the Leadership/Lean Champions at the shop how to use the technique enabling them to facilitate future, events on their own. PPG's MVP program offers a variety of Rapid Improvement Workshops as well as custom on-site consulting services.
